

CURRICULUM VITAE

Last Name: Bruno

First Name: Stefania

Sex: Female

Nationality: Italian

Birth Date: 11/11/1974

Place of Birth: Pinerolo (TO), Italy

Languages: Italian, English

E-mail Address: stefania.bruno@unito.it

Home Address: Via Toscanini 94, Pinerolo (TO), Italy

Phone Number: 0039-338-2158914

Studies:

1993-1998: Degree in Biological Science, with a score of 107 out of possible top of 110.

1999-2003: PhD in Human Oncology

2003-2007: PostDoctoral fellowship.

2008-2009: at present time works at the Department of Internal Medicine, University of Torino, Molecular Biotechnology center (MBC), Via Nizza 52, Torino, Italy (Co.Co.Pro with Sis.Ter S.p.A. for the project: Role of the human bone marrow mesenchymal stem cells in tissue regeneration after induction of experimental acute kidney injury)

Professional experience: Date, subject of study and place

1999-2001: Ex-vivo expansion and lentiviral gene transfer of human primitive cord blood stem cells capable of hematopoietic long term engraftment. Department of Oncological Science, University of Torino (Italy), Laboratory of Clinical Oncology, directed by Prof. Aglietta and Prof. Piacibello, Institute for Cancer Research and Treatment (IRCC), Candiolo (TO).

2001-2003: Expansion and differentiation of human hematopoietic progenitor and stem cells from different sources (cord blood, bone marrow, mobilized peripheral blood). Department of Oncological Science, University of Torino (Italy), Laboratory of Clinical Oncology, Institute of Cancer Research and Treatment (IRCC), Candiolo (TO).

2003-2004: Isolation and characterization of renal progenitor cells from adult human kidney. Department of Internal Medicine, University of Torino (Italy), San Giovanni Battista Hospital, Laboratory of Renal Immunopathology, directed by Prof. Camussi.

2004-2007: Isolation, characterization and functional in vitro and in vivo studies of progenitor cells isolated from kidney and renal tumours and from normal adult liver. Study of the contribution of CD133⁺ renal progenitor cells to tumor angiogenesis. Department of Internal Medicine, University of Torino, Molecular Biotechnology Center (MBC), Laboratory of Renal and Vascular Physiopathology, directed by Prof. Camussi .

2007-2009: Study of the possible role of microvesicles derived from human bone marrow mesenchymal stem cells in the repair of experimental models of acute kidney injury. Department of Internal Medicine, University of Torino, Molecular Biotechnology Center (MBC), Laboratory of Renal and Vascular Physiopathology, directed by Prof. Camussi, in collaboration with Prof. Tetta from Fresenius Medical Care.

Scientific Meetings

- European Working Group on Clinical Cell Analysis. European school of flow cytometry. Third Workshop Summer School. Clinical Cytometry in Hematology. Università d'Urbino, Italy, 17-19 September, 2000.
- XVI Congresso Nazionale della Società Italiana di Cancerologia. Torino, 5-6-7 ottobre, 2000.
- The 42ND Annual Meeting of the American Society of Hematology. San Francisco, California, December 1-5, 2000.
- Caratterizzazione ed isolamento delle Cellule Staminali a scopo di Trapianto. Torino, 26 settembre, 2001.
- Hematopoietic stem cell therapy: the basic question. Milano (Italy), 1 February 2002.
- Practical Training Course "Advanced Technologies in Stem Cell Growth and Development" (European Commission, 5th Framework Programme For RTD "Quality of Life and Management of Living Resource"- Accompanying Measure). Pisa (Italy), May 27-June 7 2002.
- 7th Congress of the European Hematology Association. 6-9 June, Florence, Italy, 2002. Oral communication: "*In vitro* and *in vivo* megakaryocyte differentiation capacity of fresh and expanded cord blood CD34⁺ cells".
- VII Congresso della Società Italiana di Ematologia Sperimentale. 15-17 Settembre, Modena (Italy), 2002. Oral communication: "Cord Blood CD34⁺ cell megakaryocytic differentiation ability after extensive ex-vivo expansion: *in vitro* and *in vivo* models".
- DNA course on FACS Vantage SE. Milano (Italy), 8-9 January, 2003.
- The International Conference II, Hematopoietic Stem Cells Research and Clinical Applications. 13-15 February, Paris, 2003.
- Third Interdisciplinary Euroconference on ANGIOGENESIS. October 24-27, Dublin (Ireland), 2003.
- Adult Stem Cells a challenge for the future. March 21-23, Bologna, Italy, 2004.
- Adult stem cells: from the basic to the bedside. October 21, Florence, Italy, 2005.
- The first ESH-EBMT-EUROCORD Euroconference on Stem Cell Research. April 15-17, 2005 in Cascais, Portugal
- Participated as a lecturer in the Fourth course on "Genetic and Renal disease" with a lesson entitled: "Stem cells in the adult kidney and their possible role in renal repair". June 8-10, 2006 in Genova, Italy.

- Stemness the bright and the dark side: normal and cancer stem cells. 19-22 September 2006, Catanzaro (Italy). Oral communication: “Resident CD133+ renal progenitor cells contribute to tumor angiogenesis”.
- 14th annual meeting of the International Society for cellular therapy (ISCT). 17-22 May 2008, Miami, Florida, USA
- World Congress of Neprhology (WCN). 22-26 May 2009, Milan, Italy. Oral communication: “Human mesenchymal stem cells-derived microvesicles protect from acute tubular injury”.

Awards

- Award of the ERA-EDTA for best abstracts. Abstract: “CD133+ renal progenitor cells contribute to development and angiogenesis of renal carcinoma. Glasgow, 2006”.
- Award of the World Congress of Nephrology for best abstract presented by young authors. Abstract: “Human mesenchymal stem cells-derived microvesicles protect from acute tubular injury”. Milan, 2009.

Lab skills:

- Hematopoietic progenitor cells, endothelial cells and renal progenitor cells purification with immunomagnetic selection and cell sorting
- Cell culture techniques: hematopoietic cells (liquid and semi-solid assay), endothelial cells, mesenchymal stem cells, renal and hepatic stem cells in vitro cultures
- Cells cryopreservation.
- Flow-cytometric analyses
- Gene transfer with lentiviral and retroviral vectors
- Lentiviral production
- Fluorescence microscopy techniques
- Immunoistochemistry techniques
- RNA purification and RT-PCR
- DNA and plasmid purification
- Immunoprecipitation and Western Blot
- Experience on animal models
